-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE ____ MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 03 April 2003.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 16-18, 23, 24, 26-35, 38-40, 42 and 44-60 is/are pending in the application.
- 4a) Of the above claim(s) ____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) ____ is/are allowed.
- 6) ☒ Claim(s) 16-18, 23, 24, 26-30, 32-35, 38-40 and 44-60 is/are rejected.
- 7) ☒ Claim(s) 31 is/are objected to.
- 8) ☐ Claim(s) ____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on ____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- 11) ☐ The proposed drawing correction filed on ____ is: a) ☐ approved b) ☐ disapproved by the Examiner.
If approved, corrected drawings are required in reply to this Office action.
- 12) ☐ The oath or declaration is objected to by the Examiner.

Priority under 35 U.S.C. §§ 119 and 120

- 13) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. ____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
* See the attached detailed Office action for a list of the certified copies not received.
- 14) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. § 119(e) (to a provisional application).
a) ☐ The translation of the foreign language provisional application has been received.
- 15) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. §§ 120 and/or 121.

Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892) 4) ☐ Interview Summary (PTO-413) Paper No(s). ____
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948) 5) ☐ Notice of Informal Patent Application (PTO-152)
- 3) ☐ Information Disclosure Statement(s) (PTO-1449) Paper No(s) ____ 6) ☐ Other: ____

Art Unit: 2711

DETAILED ACTION

Claim Rejections - 35 U.S.C. § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371© of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 16-18, 23, 24, 26-28, 30, 32, 34, 35, 45-47, and 49-60 are rejected under 35 U.S.C. 102(e) as being anticipated by Herz et al (5,758,257).

Considering claim 16, Herz discloses creating a local customer profile (see col 13 lines 12-49, customer profile meets the “local information label” limitation. The customer profile has associated with it a plurality of categories of program content including sex and violence (see col

Art Unit: 2711

4 lines 62-67). Further, Herz discloses creating the local customer profile by presenting a questionnaire for determining the customer's preferences (see col 13 lines 11-15 and lines 42-50) and since the questions are used to determine the local customer profile, Herz discloses the claimed "means for receiving answers to the questions presented to the user". Herz also discloses determining the "mood" of the user based on the received questions (see col 17 line 57 - col 18 line 5, mood meets the "psychological profile" limitation). Further, the a default values for a profile are created depending on the "mood" of the user thus Herz discloses the claimed "means for assigning a value to each of the category labels based on the determined psychological profile" limitation. The values for the "mood" of the user are used to create local information label to provide appropriate programming for a user based on the user's mood (see col 17 67 - col 18 line 20 and col 26 lines 25-35).

Considering claims 17, Herz discloses presenting questions to a user which are used to for a customer profile or label, since the questions are not the actual customer profile, the questions are "indirectly" related to the category labels (see col 13 lines 10-15 and col 13 lines 40-50).

Considering claim 18, Herz discloses providing a questionnaire to user which presents descriptive phrases which describe categories of program content associated with the category labels (col 13 lines 10-15 and col 13 lines 40-50).

Considering claim 23, Herz discloses receiving a program signal with a content profile of a the program wherein the content profile has categories which identifies the content of the program (col 11 lines 30-58). Herz further discloses storing an ID code of the user to determine which

Art Unit: 2711

user watched what programs (col 26 lines 30-35 and col 25 lines 35-40, col 49 lines 7-30).

Further, Herz discloses a means for a user to input the rating of a program which meets the claimed “means for inputting a signal which indicates the user’s level of enjoyment of each program presented” (col 30 lines 30-35). Further, Herz discloses providing program content to a user based on the type of programs enjoyed by the user (see col 30 lines 1-40, col 11 lines 63 - col 12 line 7).

Considering claims 24 and 26, Herz discloses providing a listing or preferred programming meeting the “menu” limitation based on the user’s level of enjoyment and on the viewing history (see col 14 lines 10-35, col 19 lines 60-65, col 30 lines 30-35).

Considering claims 27, 30 and 52, claims 27, 30 and 52 recites the same limitations as claimed in claims 16 and 23 and is therefore rejected for at least the same reasons provided above. Further claims 27, 30 and 52 recites the limitations “receiving an indication from the user that the content of the program is at least one of unacceptable and acceptable, modifying the value associated with the local category label based on the received indication from the user that the content of the program is at least one of unacceptable and acceptable and forming the local information label based on the modified value associated with the local category label”. Herz discloses that a user can modify the content value of the content profile and the customer profile if the user disagrees with the assigned content profile of the program (see col 15 lines 45-65, col 30 lines 30-35). By modifying the content profile, the user indicates that the content profile of label is unacceptable.

Art Unit: 2711

Considering claim 28, Herz discloses a user having the ability to modify the content profile which would include reducing the value of the label (see col 15 lines 45-65 and col 30 lines 30-35).

Considering claim 32, Herz discloses a remote control device for entering a customer profile, thus the buttons on the remote control are associated with a local information label (see col 45 lines 56-63).

Considering claims 34 and 45, Herz discloses rating a program at a plurality of levels including profanity, violence and sex (col 11 lines 45-55) and providing an advertisement based on the user's content profile (col 47 lines 53-67). Since targeted advertisements are run during a program, and program and customized advertising are provided based on the customer content profile, Herz discloses the claimed "scanning the program information label to ascertain the instantaneous content level of the program over the duration of the program, determining one of a plurality of advertisements to be run during the program based upon the instantaneous content level of the program and scheduling one advertisement within the program at a time based on the instantaneous content of the program information label".

Considering claim 35, Herz discloses creating a customer profile for two users in a household (col 49 lines 7-27) wherein the customer profiles are received by receiving local information labels by questionnaires (col 13 lines 42-45). Further Herz discloses when two or more customers, like a husband and wife, a cluster or combined customer profile is created to accommodate two viewers (col 49 lines 7-27). Herz further discloses a profile for each member

Art Unit: 2711

in the household and a combination profile for two or more members. Further, Herz discloses an associated content value which identifies a level of program content (level of content met by “weights” see col 13 lines 42-50) and averaging the values for customers at the same location or household (see col 13 lines 43-55 and col 26 lines 24-40).

Considering claims 46 and 47, Herz discloses an information label which specifies at content level of sex and violence (see col 11 lines 45-58) and displaying a target advertisement after the determination of the content level (see col 47 lines 53-67). The claimed “predetermined time” is met by the time at which the advertisement is supposed to schedule (see col 29 lines 45-50).

Claims 49, 50, 51, 53, 54, 55 and 57 recites the same limitations as the claims above and is therefore rejected for at least the same reasons provided above. Note: the viewing history is met by view habits (see Herz col 46 lines 45-50) and menu is met by channel list (see Herz col 14 lines 10-35, col 19 lines 60-65, col 45 lines 34-55).

Considering claim 56, Herz discloses the claimed wherein programs available are for viewing are represented as channels on a television (see col 45 lines 34-55).

Considering claim 58, claim 58 recites the same limitations found in the claims above and is rejected for at least the same reasons provided above. Further, claim 58 recites “means for assigning a value to each of the category labels based on the received answers”. As discussed above, Herz discloses providing a questionnaire for constructing a customer profile. The customer profile has weights for each category (see col 11 lines 45-57 and col 13 lines 40-50).

Art Unit: 2711

The questionnaire provides assigning a value to each of the category labels based on the received answers. Further, Herz discloses modifying the content profiles, including the local customer profile, if the user disagrees with the program content context rating (see col 15 lines 45-60 and col 30 lines 29-40). Thus Herz discloses the claimed “wherein the local information label is modified based on the program context” limitation.

Considering claim 59, Herz discloses representing content in terms of written context (see “profanity” and “violence” in col 11 lines 45-57). The written context are associated with a rating, thus the context is represented by a variable.

Considering claim 60, Herz discloses transmitting bits for digital transmission thus discloses the claimed “wherein the variable is represented by bits in a transmitted information label” (see col 25 lines 1-5).

Claim Rejections - 35 U.S.C. § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 33, 44 and 48 are rejected under 35 U.S.C. 103(a) as being unpatentable over Herz et al.

Art Unit: 2711

Considering claim 33, Herz fails to disclose the claimed voice recognition system. The Examiner Takes Official Notice that the use of a voice recognition system would have been a well known quick means of identifying a viewer in a television system. Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to modify Herz to include the claimed voice recognition system to provide a quick but effective means for identifying a viewer.

Considering claims 44 and 48, the limitations which are similar to the limitations recited above are rejected for at least the same reasons provided above. Further, claim 44 recites “a means for automatically identifying at least one user when the one user is in an area where the program is being presented”. Herz discloses identifying a user in an area where the program is presented by a user inputting an ID (see col 26 lines 25-40). Herz fails to disclose identifying a user via voice recognition, physical feature or fingerprint. The Examiner Takes Official Notice that the use of a voice recognition system would have been a well known quick means of identifying a viewer in a television system. Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to modify Herz to include the claimed voice recognition system to provide a quick but effective means for identifying a viewer.

5. Claims 38 rejected under 35 U.S.C. 103(a) as being unpatentable over Herz et al in view of Ming et al (5,710,815).

Art Unit: 2711

Considering claim 29, Herz fails to disclose the claimed blocking at least a portion of the program or substituting program material for objectionable material when the value associated with the local category label is less than the value of the transmitted label.

Ming teaches by providing content labels or values for each frame, parts of a program can be edited from viewing inappropriate material when the value associated with the label category is less than the value of the transmitted label enabling a user to view most of the program (see col 8 lines 15-21 and lines 51-60). It would have been obvious providing content labels for each frames would have enabled editing only those frames which contain the objectionable material thus permitting the user to view most of the program. Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to modify Herz to include the claimed limitation to permit a viewer to view most of a program while editing out only the objectionable material.

Considering claim 38, claim 38 recites the same limitations as discussed in the claims above and are rejected for at least the same reasons provide above. Claim 38 further recites receiving information as frames of a signal and providing for prevention to access to a part of each frame which does not have information content which compares favorably with the local information label. Ming teaches by providing content labels or values for each frame, parts of a program can be edited from viewing inappropriate material enabling a user to view most of the program (see col 8 lines 15-21 and lines 51-60). It would have been obvious providing content labels for each frames would have enabled editing only those frames which contain the

Art Unit: 2711

objectionable material thus permitting the user to view most of the program. Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to modify Herz to include the claimed limitation to permit a viewer to view most of a program while editing out only the objectionable material.

Considering claim 39, Herz discloses the claimed subcategories of violence and sex (see col 11 lines 49-51).

Regarding claim 40, the combination of Herz and Ming discloses the claimed limitation, wherein Herz discloses storing the local profile or label (col 45 lines 10-33) and Ming discloses receiving frames of content which can be edited based on content (see col 8 lines 15-21 and lines 51-60) which means the received information content label varies for each frame.

Considering claim 42, Herz discloses the claimed television program signal (met by program guide, settop and CATV, see col 45 lines 10-30).

Allowable Subject Matter

6. Claim 31 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 2711

7. The indicated allowability of the claims is withdrawn in view of the newly discovered reference(s). Rejections based on the newly cited reference(s) are provided above.

Art Unit: 2711

Response to Arguments

Applicant argues that Herz fails to disclose or suggest means for assigning a value to each of the category labels based on the determined psychological profile.

The Examiner respectfully disagrees. As discussed in the office action, default values for a profile are created depending on the "mood" of the user and thus Herz discloses the broadly claimed limitation. The Examiner urges Applicants to further define how the values are assigned to the labels based on the psychological profile to define over Herz.

Applicant argues that Herz fails to disclose means for storing an identification code of the user for each program presented to the user, and likewise fails to disclose b) means for storing the at least one category label value for programs presented to the user.

The Examiner respectfully disagrees. Herz clearly discloses providing an identification code for each user in col. 26 lines 30-35 and programs watched col. 25 lines 35-40. As result the applicant's arguments are not persuasive.

Applicant argues that Herz fails to disclose inputting a signal which indicates the user's level of enjoyment of each program presented to the user, and means for storing the at least one category label value for programs presented to the user and user's indicated level of enjoyment.

The Examiner respectfully disagrees. Herz discloses the claimed limitations is column 25

Art Unit: 2711

lines 30-35, col. 30 lines 1-40, col. 11 line 63 - col. 12 line 7 as discussed in the office action. As a result, the Applicant's arguments are not persuasive.

Applicant argues that Herz fails to disclose scanning the program information label to ascertain the instantaneous content level of the program over the duration of the program and Applicant argues that Herz fails to disclose determining one of a plurality of advertisements to be run during said program based upon the instantaneous content level of the program.

The Examiner respectfully disagrees. Herz does indeed ascertain the instantaneous content level of the program over the duration of the program and discloses determining an advertisement (target) to be displayed as discussed in the previous office action. As a result, the Applicant arguments are not persuasive.

Applicant argues that Herz fails to disclose the claimed averaging the values associated with the category labels for the first and second local information labels to obtain a value associated with the category label of the combination local information label.

The Examiner respectfully disagrees. A cluster or combined customer profile is created to accommodate two or more viewers like a husband and wife (see col 49 lines 7-27) and as a result, Herz discloses the claimed limitation.

Applicant request's a reference to the official notice taken regarding the voice recognition system. The Examiner cites Harada et al (5,721,583), Florin et al (5,583,560) and Hunter et al (5,485,518).

Art Unit: 2711

Applicant argues that Ming fails to disclose receiving information as frames of a signal and providing for prevention of access to a part of each frame which does not have information content which compares favorably with the local information label.

The Examiner respectfully disagrees. Ming clearly discloses the limitations in col. 8 lines 15-21 and lines 51-60. As a result, the Applicant's arguments are not persuasive.

Conclusion

8. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.

Any response to this action should be mailed to:

Art Unit: 2711

Commissioner of Patents and Trademarks

Washington, D.C. 20231

or faxed to:

(703) 308-9051, (for formal communications intended for entry)

Or:

(703) 308- 5399 (for informal or draft communications, please label

"PROPOSED" or "DRAFT")

Hand-delivered responses should be brought to Crystal Park II, 2121 Crystal Drive, Arlington. VA., Sixth Floor (Receptionist).

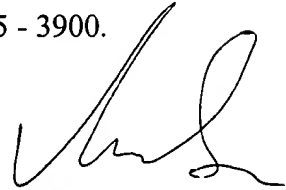

9. Any inquiry concerning this communication or earlier from the examiner should be directed to Vivek Srivastava whose telephone number is (703) 305 - 4038. The examiner can normally be reached on Monday - Thursday from 7:00 am to 5:30 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Andy Faile, can be reached at (703) 305 - 4380.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the group receptionist whose telephone number is (703) 305 - 3900.
